

WINDOW CLEANER & AIR PURIFIER
Clean Window Also Clean The Air

PURETi is a water-based surface treatment that is sprayed on glass, curtains, and light fixtures. Registered a breakthrough technology **"Photocatalysis"** safe for material surface contact approved by FDA & NSF to improve indoor air quality by **reducing VOCs up to 70%**.

- ◆ Light energy coming through glass activates PURETi's **photocatalytic TiO₂ particles**. Durably bonded, invisible mineral particles on the surface react with rays from the sun light / UV-A light to transform the glass into an air scrubber. Build-up film on glass, make wiping away fingerprints and smudges a snap, destroy harmful airborne pollutants and lingering odor molecules for months
- ◆ Suitable for any indoor conditions likes living room, dinning room, lobby, office, classroom, hotel, library, laboratory, hospital, clinic, nursery room, smoking room, pet room, inside the car or boat, and more.
